Strom Plumbing

Welcome to the World of Strom Plumbing

For over 30 years, Sign of the Crab has provided quality solid brass items for the home and bath. Our plumbing line was developed during that time and our name, Strom, means “stream” or “river” in the family’s native land of Norway. Thus, the beautiful rivers of the world are represented in our catalog, each denoting a different faucet style, as our tub line represents the beautiful lakes of the world. From our newest series of faucets, cast iron and acrylic tubs, to those products that have been our mainstays for many years, each has been designed and developed to make a statement about the distinctive styling of the product and its buyer.

We have the largest selection of solid brass fixtures in our industry, with the quality and craftsmanship that are represented in thousands of installations. Each item is individually assembled and tested in the United States. This allows us to closely control the quality in every piece, and assure that you will receive the highest quality product.

This past year we have made a significant investment in our facilities, both on the warehousing side and the computer side, to ensure that we can deliver on our pledge to you: We will continue to search the world for the highest quality products and the best people to serve you.

Strom Plumbing

BY
Sign of the Crab

Orders will only be accepted from established accounts and qualified new accounts. We sell only to the plumbing trade and there is no direct purchasing by retail customers.

All Products are Solid Brass

Our faucets are constructed with high quality, low lead brass. They meet all current regulations with regard to lead composition. Each item is individually assembled and tested in the United States.

Finishes

Our finishes include Chrome, Matte Nickel, Polished Nickel, Supercoated Brass, Supercoated Copper and Oil Rubbed Bronze. The Oil Rubbed Bronze (“non-living”) is a fragile finish that must be inspected prior to installation and is not warranted further.

Care of Supercoat

Supercoat items should be wiped gently with a soft cloth after each use. Plumber’s putty should not be used for installation. Use of plumber’s putty, detergents or abrasive cleaners will void the warranty of the finish as they may cause deterioration of the coating. We recommend a bead of waterproof silicone where putty is needed.

Valve Types

All faucets will be shipped with 1/4 turn ceramic valves. Our 1/4 turn ceramic cartridge uses 2 ceramic disks that rotate to open and close the valve, minimizing mechanical wear. Our pressure balance valves sense the drop in the supply pressure on the cold or hot side if another valve in the system is being used. Thermostatic valves control the output of the faucet and keep the temperature constant.

Leg Tub Faucets

Our leg tub faucets are faithful reproductions of antique originals. Our British Telephone Series have Swing Arm Couplers installed for variable centers. All other faucets with standard inlet assemblies have 3 3/8” centers. All handheld shower units with hoses come with a vacuum breaker as part of the set.

Lavatory Sets

Our Widespread Lavatory and Center Sets all include a pop-up drain. The widespread sets have 12” stainless steel flex hoses to vary the centers from 8” to 12”. Use our sink trim kits on page 92 for our lavatory sets.

Installation Instructions

Installation Instructions are included with every faucet and are also available on our website.

Tub Warranty

Our tubs are warranted to be free of manufacturing and mechanical defects for a period of 2 years from date of purchase, when properly installed by a qualified, licensed plumber. In most cases on-site repair of the tub will be accomplished, minimizing the inconvenience to the customer.

Warranty

All items other than tubs are warranted to be free of manufacturing and mechanical defects for a period of 5 years from date of purchase, when properly installed by a qualified, licensed plumber. This warranty covers replacement of defective parts, not of complete product, unless deemed necessary by a customer service representative. The warranty does not extend to labor charges or air freight charges when repair or replacement of the item is needed. The warranty only applies to interior installations. Shower Curtains are not warranted.

Ceramic Handle Warranty

All our ceramic handles are warranted for 5 years from date of purchase. Any ceramic handle developing cracks or chips will be promptly replaced, as a cracked or broken handle may result in personal injury.

Lifetime Supercoat Warranty

For the many customers that desire a finish that is virtually care-free and want to avoid the necessity of polishing, we have developed our Supercoat protective finish. Our Supercoating is a 2 part epoxy, applied electrostatically, and baked on to insure a lasting shine. It is absolutely guaranteed for as long as the original purchaser owns their home and proper maintenance instructions are followed. The product must be returned to our factory for re-coating. We will re-coat, not replace the product if a defect of the Supercoat finish occurs.

Price Changes

Prices are subject to change without notice. Unless price is protected in writing, shipments will be at prevailing prices.

P0879Z

**The Windemere,
70" Acrylic Tub without Faucet Hole Drillings
Includes integrated Waste & Overflow Drain
Assembly (shown in Oil Rubbed Bronze finish)**

- P0809S** – Supercoat Brass Legs
- P0809W** – White Legs
- P0809Z** – Oil Rubbed Bronze Legs

P0809C Detail

This tub's two-piece construction houses the supply and drain assembly which are concealed for a clean appearance. The motor for the massage action has an in-line heater to maintain the heat of the water temperature. The high quality steel frame with our solid brass legs can level this tub on any style floor. This is the largest integral slipper style air tub on the market. There are 20 jets spaced approximately 6" apart around the interior wall of the tub, 2" from tub floor.

P0773
The Mammoth,
75" Acrylic Dual Tub on Pedestal
without Faucet Hole Drillings

Also available:
P0772 – The Mammoth, 75" Acrylic Dual
Tub on Pedestal with 7" center

P0699S
Supercoat Brass
Royal Aqueduct Water
Delivery and Drain System

This is the only true reproduction for leg tub faucetry done in this century. It incorporates the overflow into a lift and turn waste that was unique to the late 1800's. All parts are solid brass, forged to today's standards. Using 3/4" IPS connections at 11" on center.

These parts are included in the kit.

This set-up maximizes filling a tub with a fill rate of 10–12 gallons per minute with installation pressure greater than 50 PSI.

P0819C – Hodder High Flow Singles with Crosspoint Handles

P0823C – Straight Supply Set, 3/4" OD, 1/2" IPS

P0679C – 12" Wall Brace
P0694C – 1/2" IPS Riser, 36" Long

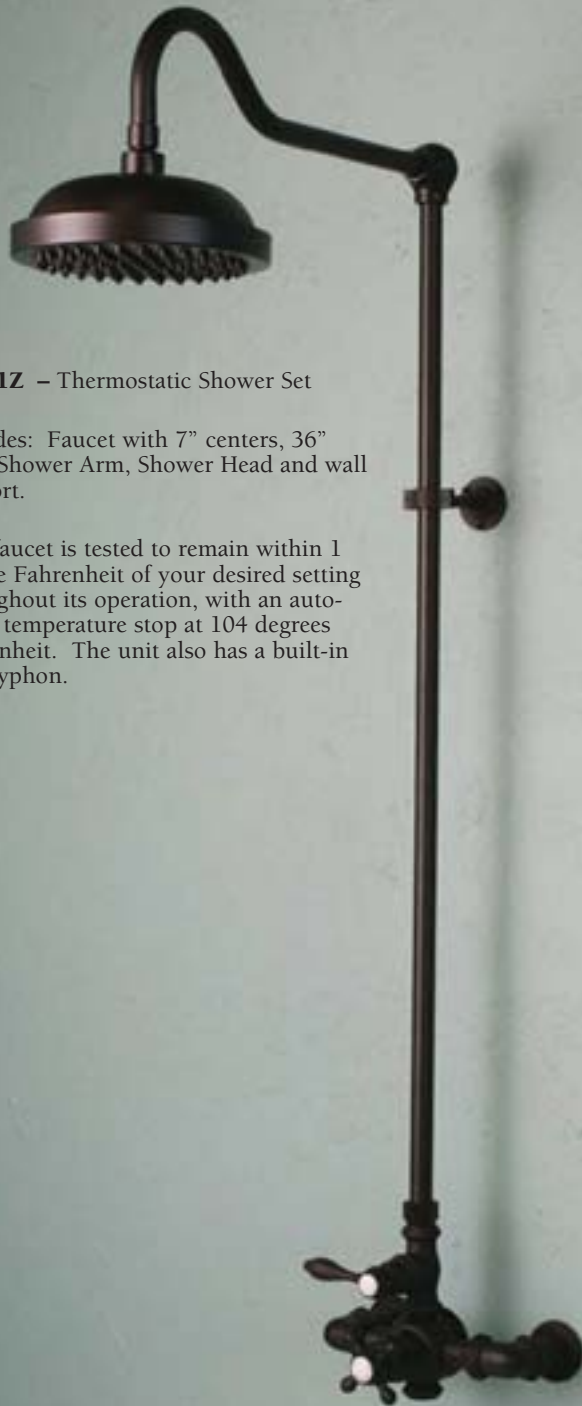

P0713C – Chrome Shower Set with Handheld Shower
Includes: Faucet with 3-3/8" centers, 36" Riser, Wall Brace, Shower Arm, Shower Head, Handheld Shower, Hose and Wall Bracket.
Add our P0651C In-Wall Pressure Balance Kit to make this set a pressure balance unit.

P0651C – In-Wall Pressure Balance Unit

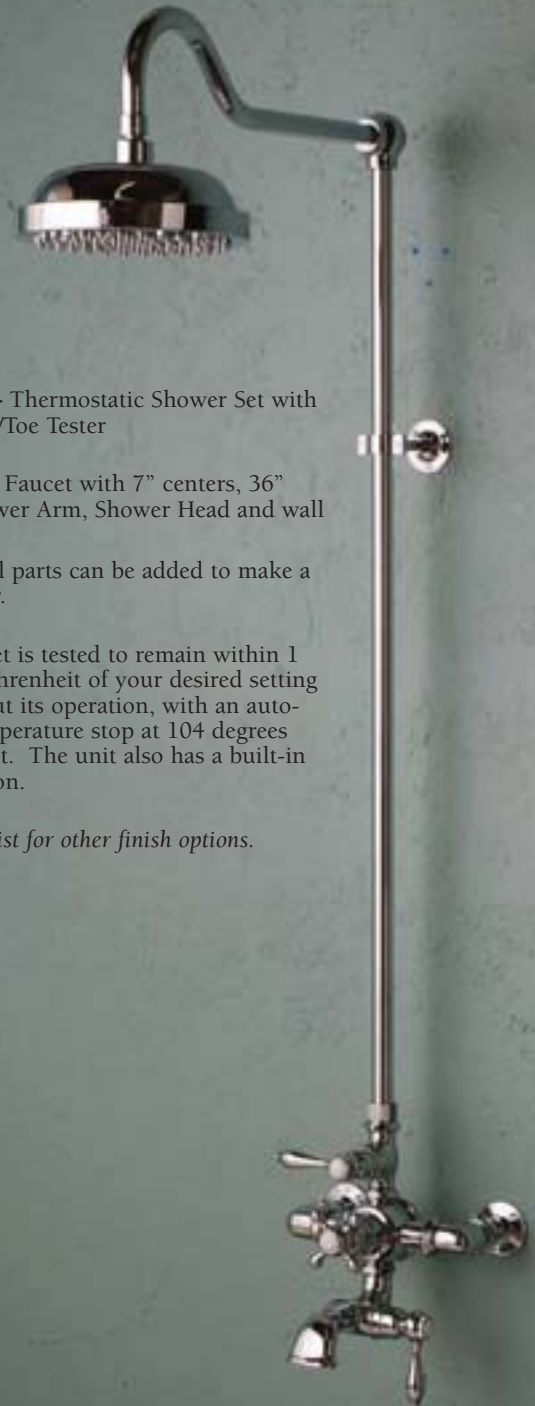

P0678C – Shower Set
Includes:
Faucet with 3-3/8" centers, 36" Riser, Shower Arm, Shower Head and Wall Brace

P0901Z – Thermostatic Shower Set

Includes: Faucet with 7” centers, 36” riser, Shower Arm, Shower Head and wall support.

This faucet is tested to remain within 1 degree Fahrenheit of your desired setting throughout its operation, with an automatic temperature stop at 104 degrees Fahrenheit. The unit also has a built-in anti-syphon.

P0903C – Thermostatic Shower Set with Tub Filler/Toe Tester

Includes: Faucet with 7” centers, 36” riser, Shower Arm, Shower Head and wall support.

Additional parts can be added to make a taller riser.

This faucet is tested to remain within 1 degree Fahrenheit of your desired setting throughout its operation, with an automatic temperature stop at 104 degrees Fahrenheit. The unit also has a built-in anti-syphon.

See price list for other finish options.

P0902C – Thermostatic Shower Set with Handheld Shower (shown with P0904C sold separately)

Includes: Faucet with 7” centers, 36” Riser, Shower Arm, 8” Shower Head, Handheld Shower, Wall Bracket and 12” Wall Support.

This faucet is tested to remain within 1 degree Fahrenheit of your desired setting throughout its operation, with an automatic temperature stop at 104 degrees Fahrenheit. The unit also has a built-in anti-syphon.

See price list for other finish options.

P0904C – Double Triple Headed Spray Bar Unit (sold separately from Shower Set)

P0902C Thermostatic Shower Set and **P0904C** Spray Bar Unit (sold separately)

P0902C – Thermostatic Shower Set with Handheld Shower (shown with P0872C sold separately)

Includes: Faucet with 7” centers, 36” Riser, Shower Arm, 8” Shower Head, Handheld Shower, Riser Bracket and 12” Wall Support.

This faucet is tested to remain within 1 degree Fahrenheit of your desired setting throughout its operation, with an automatic temperature stop at 104 degrees Fahrenheit. The unit also has a built-in anti-syphon.

See price list for other finish options.

P0902C Thermostatic Shower Set and P0872C Spray Bar Unit (sold separately)

P0872C – Double Single Headed Spray Bar Unit (sold separately from Shower Set)

This is the introduction of our Thermostatic In-Wall Component Systems. These systems measure the water on the outlet of the valve to maintain a setting within 1 degree Fahrenheit. This fact, along with the ability to mix and match your favorite trim and superior control for flow rates, makes them the right choice for every installation. To build your system, please refer to page 79. See pages 80-83 to realize the potential and flexibility that this gives you.

Steps To Order your Thermostatic System:

1. Choose the Thermostatic Control Valve Option.

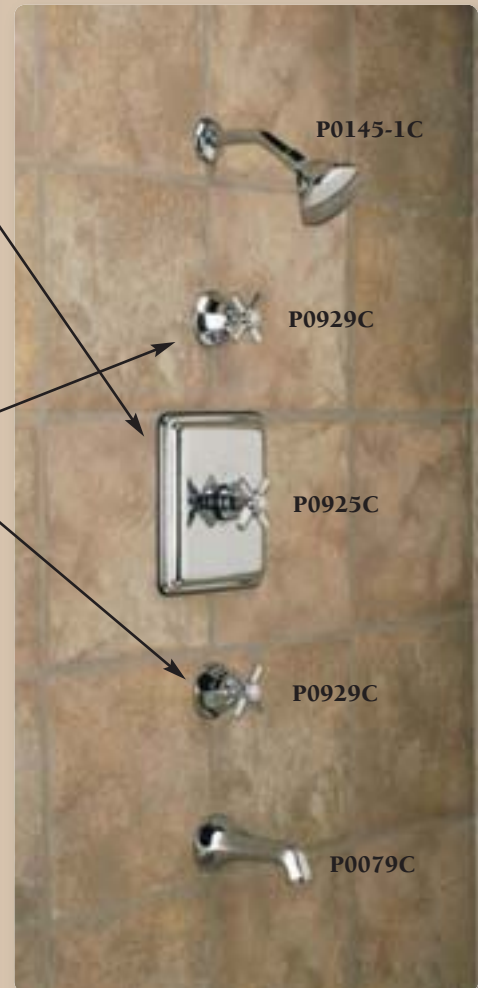

The pictures on page 79 show six different trim options for the Thermostatic Control Valve. Each option includes the valve, the large plate and the handle. *You need one of these for every Component System.*

2. Choose the Volume Control Valve Option. You need one for each shower head, body spray or spout being added to your system.

The pictures on page 79 show six different trim options for the Volume Control Valve. This valve controls the on, off and volume function of the outlet. Each option includes the valve, escutcheon and the handles. *You need one of these for every outlet in your system, whether you choose a shower head, body spray, or spout.*

3. Choose the Shower Heads, Body Sprays, and Spouts.

See page numbers 84-87 for shower heads and body sprays, and page 94 for spouts.

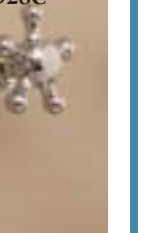

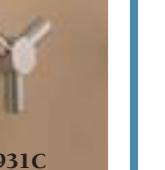

Note that symbol and lettered buttons for our handles, along with metal buttons, are now available, sold separately.
